DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 2, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 4,495,518 to Sanoian in view of U.S. Patent Application Publication 2003/0146840 to Donskoy et al [hereinafter Donskoy].

Sanoian discloses a method to nondestructively locate termite infestation sites in a structure, the method comprising using a thermal imaging camera to receive a thermal image of the structure to identify potential infestation sites; wherein the thermal image is received without prior electromagnetic radiation of the structure, and the structure is heated or cooled (see column 2, lines 1-35; column 3, lines 29-36; and column 4, lines 1-5, 12-28, and 52-57).

Sanoian does not disclose confirming that there is a termite infestation in the sites by using a microwave motion detector.

Donskoy discloses a method of reliably detecting the presence of termites in a wooden structure by using a microwave motion detector to nondestructively detect movement of the termites in the structure (see paragraphs 22-24).

Referring to claim 1, it would have been obvious to a person having ordinary skill in the

Art Unit: 2859

art at the time the invention was made to modify the method of Sanoian by further using a microwave motion detector to detect the presence of termites, as taught by Donskoy, in order to determine if there are termites in the identified moist sites, thus confirming that there is a termite infestation in the sites.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
